2.4 GHz Digital Wireless Microphone

Adaptive Frequency Hopping Technology

Dyna-Mic.01

The ultimate in ease-of-use, the Dyna-mic is one of the most advanced wireless digital microphones available on the market today. V2GO's proprietary 2.4 GHz Adaptive Frequency Hopping Technology (AFHT) offers strong interference rejection, while smoothly reproducing clear sound—and better sound means better performance!

- Using the Dyna-mic is simple; simply plug it in and turn it on—that's it!
- No need for manual channel switching, the Dyna-mic does it—automatically!
- No need to worry about battery life, you get up to 25-30 hours microphone battery life (continuous use).

One or two-pack kits available

Full Audio Spectrum: Sing, Talk, and Play

Ideal for:

- KJs
- Singers
- Karaoke
- Musicians
- Schools
- Churches
- Instructors
- Public Speakers

Probably The Easiest Wireless Microphone You Will Ever Use!

Key Features:

- 2.4 GHz wireless transmission
- Streaming CD quality
- Full frequency response 20-20KHz +/- 1.5 dB (smoothly reproduces clear sound)
- Adaptive Frequency Hopping Technology (AFHT)
- 25-30 Hrs. Mic battery life
- Quick and Easy setup and operation
- Highly sensitive dynamic microphone
- Rugged shock resistant head
